MeetHear™

Effective Communication

Breaking Barriers

MeetHear is a communication system that supports integrated employment of employees who are deaf, hard of hearing or have cognitive disorders, and provides them with a tool enabling them to join in discussions and meetings.

- Supports speech-to-text, endorsed by many academic studies
 - Brief training creates 95+% accuracy
- Immediate availability of information
 - Text can be captured and saved, and emailed to any number of recipients
- Exclusive multi-tasking feature, avoids the extra cost of an additional computer
- Multiple meeting rooms can be used in the same facility
 - Supports multiple users in meetings
- Cost effective compared to other forms of accommodation
 - Immediate availability, no scheduling of outside resources
- Inclusive, allows individuals to sit anywhere
 - Interactive for individuals who are unable to speak
